

GLASS COMPANY

The American Institute of Architects Continuing Education System AIA/CES Registered Provider Program Summary Handout

Provider: Trainor Glass Company

Length: 1 hour

Program #: GBSD01

Credit: 1 LU Hour

Program: Glazing in Green Building

HSW: Yes **SD:** Yes 

Description: A presentation on how the glass industry can contribute to sustainable building and LEED certification.

Target Audience: Architects, specifiers, owners, general contractors, and other industry specific professionals. The ideal audience size can be one on one or up to 30. This program meets all experience levels. Time is designated for a question and answer session.

Learning Objectives: (1) The role glass and aluminum framing products play in the environmental impact of construction (2) How to use glazing products and methods in design that will improve the long-term energy efficiency of a building (3) Which LEED credits glazing contractors can assist in achieving and (4) How daylighting techniques can improve occupant comfort and productivity.

Facilitator Qualifications: All Trainor Glass CES facilitators have been trained on CES guidelines and presentation material. Including 40 hours mandatory industry related training per year.

How Taught: The CES facilitator utilizes a PowerPoint presentation to thoroughly review the various roles glazing plays in green building. It follows the outline of the applicable LEED NC 3.0 credits. Many product samples are on display and passed around as hands on examples.

A/V Needed: Electrical power and a screen for the PowerPoint or slide presentation. (The CES facilitator supplies the laptop and projector.)

Costs: There is no cost to bring this program to your facility.
